

Versatile, Powerful, and Easy-to-Use Point-of-Sale App

The SkyLink® POS point-of-sale system runs on iOS® and Android® tablets and phones, with the features small retailers and restaurants need for running fast, efficient businesses.

Order Entry

- On-screen product images for accurate order entry
- Ring up items, discounts, & tax
- Apply tax rates at the item level
- Accept on-screen signatures & tips
- Configure required and optional product add-ons
- Inventory tracking with barcode scanner support
- Link orders to specific customer accounts

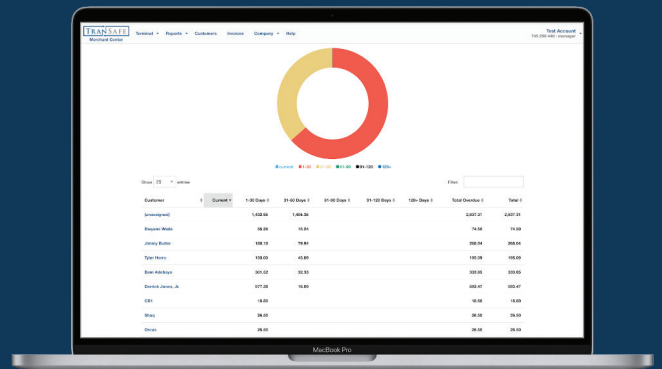

Payment Acceptance

- Accept and track cash and all credit and debit cards, including chip (EMV) cards
- Accept contactless (NFC) payments including Apple Pay®, Google Pay™, and more
- Send paperless receipts via email or text message
- Multiple types of payment terminals supported – Select what's best for you
- Automatic Level II and Level III compliance for lowest credit card fees

TranSafe® Merchant Center for SkyLink®

- Monitor activity, sales, & refunds remotely via the TranSafe® Merchant Center
- Centrally view and manage transactions from all devices and users
- View and export basic reports (sales, tax, tips, cash)
- Track your best selling products and customers
- Add and manage Recurring and Installment payments
- Customer database for “on account” transactions
- Import/Export products, modifiers, taxes, and discounts – Quick replication for additional locations

Electronic Invoicing

- Create and manage invoices for billing
- Send invoices via email or text message
- Accept customer payments online
- Track invoice aging – monitor current and overdue invoice amounts
